YIELD AND FORAGE QUALITY OF COOL-SEASON GRASSES¹

G.E. Shewmaker and H.F. Mayland USDA-ARS, Kimberly, Idaho

Introduction

The Conservation Reserve Program has stimulated interest in planting cool-season, semi-

CONCLUSIONS

1.The Russian wildryes (BOZOISKY and RWR SYN-A) had impressive yields under both irrigated and dry conditions. Both grasses produced early growth and maintained green leaves throughout the season.
