

_____ to EHS. Attach the printed label to the bag or other container.

Mercury-containing equipment may not accumulate for longer than one year from the date the waste is generated.

Spills

Small spills involve amounts that may have been released from a broken thermometer.

Spills larger than about 2 tablespoons may require notification to regulatory agencies.

Contact EHS at (208) 885-6524 immediately if spill is larger than the amount in a thermometer.

Do not use a vacuum cleaner, broom, or mop to clean up the spill.

Contain the spill by putting pieces of duct tape over the mercury droplets.

Open exterior windows.

Seal off the area and advise others of the spill (e.g. post a sign "Caution –
