

How to Calculate Pig Weight Using a Measuring Tape

- 1) Measure the pig's heart girth. Place the fabric measuring tape around the pig, just behind the front legs. Note the pig's circumference in inches.
- 2) Measure the pig's length. Start at the base of the pig's ears and measure to the base of its tail. Note the pig's length in inches.

the girth, "ou #ill

s\$quare the heart girth measurement.

%or e&le, if the pig had a heart girth of ' ' inches(' ' & ' ') $1*3+$

')

Multipl" the pig's girth measurement b" its length.

,f our e&le pig had a length measurement of 3* inches(

$1*3+ \& 3*) - ., . / '$

.)
