The construction of the Polya Math Center was financed by the state of California. The center extends beyond simply imparting algebra and trigonometry to students preparing for calculus to teaching students how to learn mathematics. Many of the students in our program are already college graduates who are returning to complete their education. The center provides them with a successful experience in a plus computer program. The program grows to support all of the calculus and advanced mathematics by helping students solve a way of studying and exams to monitor progress will source to which students can
